

HUNTER WINDHAM HOT TUBS specializes in selling Bullfrog Spas
 ...and for a very good reason...

Why Bullfrog Spas?... Bullfrog Hot Tubs are Unique!

Bullfrog's spas are the world's only hot tubs equipped with the patented JetPak System™ of modular hot tub jets. JetPak® technology delivers incredible power, maximum versatility, and allows you to upgrade your spa's jetting with new JetPaks, both now and in the future.

Because of the innovative JetPak System™, Bullfrog Spas are completely customizable and upgradeable, are virtually leak-proof, and are extremely energy efficient. Bullfrog Spas use 90% less plumbing and we have eliminated diverter valves, which, gives Bullfrog Spas more pressure and more powerful jets than the competition. Bullfrog Spas are constructed using state of the art manufacturing technology and the most advanced and durable materials available to ensure that you experience years of worry-free use. Cutting edge JetPak® technology and unmatched durability and function give you peace of mind and allow you to enjoy the ultimate reason for purchasing a hot tub... your well-deserved rest & relaxation!

Bullfrog Spas vs. "Me-Too" Spas

Spa-ghetti? The spa above shows how a traditional "Me-Too" hot tub is plumbed

What is a JetPak?

JetPaks are interchangeable jetted seat backs that are designed to fit into any seat in your Bullfrog Spa. JetPaks may be moved to any seat in the hot tub in under one minute to suit your personal massage needs. This revolutionary modular technology is hailed by experts as the most significant advancement in home spas since the invention of the portable hot tub.

What Does This Mean to Me?

- * This means JetPaks are Customizable – You design the spa that perfectly suits your needs, with the jetting choices and the arrangement that works best for you.
- * JetPaks are Interchangeable – You can move JetPaks around between spa seats. You can decide where your favorite JetPaks go. You can't do that in any other spa!
- * JetPaks are Upgradeable - Your spa will never become outdated. As new JetPaks become available, you can easily upgrade without buying an entirely new spa.

The Most Powerful Spa, No Diverter Valves Less Plumbing Equals More Power

Bullfrog Spas are engineered to be more powerful without using more energy. This “Power-Plus” concept means that you will have more powerful hot tub jets without having to use a larger pump. With a Bullfrog Spa there is much less plumbing per jet, and consequently less water friction. The unique JetPak plumbing design of a Bullfrog Spa allows every jet in the spa to run at the same time. All conventional spas have diverter valves that run only some of the jets at any one time because they do not have enough power to run all the jets simultaneously. In a Bullfrog Spa, every single person in the spa can enjoy their customized massage together.

EnergySave™ means Energy Efficient Most Energy Efficient means Lowest Cost to Own

Bullfrog Spas are the most energy efficient spas in the world. The “EnergySave” design insulates the spa completely to prevent heat escape. With JetPak® technology, heat is recycled in the spa because the plumbing stays immersed in the hot water. Every single Bullfrog Spa model meets or exceeds the stringent energy guidelines of California Energy Commission (CEC). With the superior energy efficiency, you will enjoy keeping extra money each month almost as much as you will enjoy relaxing in your spa.

The Best Hot Tub Starts with a Solid Foundation

From the ground up, your Bullfrog Spa is built to be dependable and practically bullet-proof. The “Uni-System” structure, which provides the base for the spa, fits together with exact precision. Support for the thousands of pounds of water that is contained in the spa is provided by dense foam supports. The structural columns are injection molded the exact same way every time with no human error. The equipment base absorbs any vibration from the industrial grade pumps and provides easy access to all of all spa equipment. As a part of the design, the molded spa base has hand-holds for moving the spa, electrical “chase-ways” for electrical connection, vents to keep out unwanted rodents and pests, and an easy-access external drain. Absolutely nothing about the way Bullfrog builds your hot tub is flimsy or weak. Your Bullfrog Spa is extremely durable, worry-free, and it will allow you to forget your worries and focus only on comfort and relaxation.
